

EXP 31: Create a Web Blog Using WordPress

Name: Y. Roshitha (192424400)

Aim:

To create a blog using WordPress and demonstrate the use of basic HTML tags such as the Anchor tag and the Title tag within a published blog post.

Algorithm:

- Step 1: Start the program.
- Step 2: Log in to the WordPress dashboard.
- Step 3: Create a new blog post.
- Step 4: Enter the title of the blog.
- Step 5: Add content using HTML tags.
- Step 6: Insert hyperlinks, images, and formatted text.
- Step 7: Preview the blog post.
- Step 8: Publish the blog and verify the output.
- Step 9: Stop the process.

Source Code:

```
<!-- Demonstration of HTML tags within a WordPress blog post (Custom HTML block) -->

<title>My First WordPress Blog - AI Lab</title>

<h1>Welcome to My AI Lab Blog</h1>

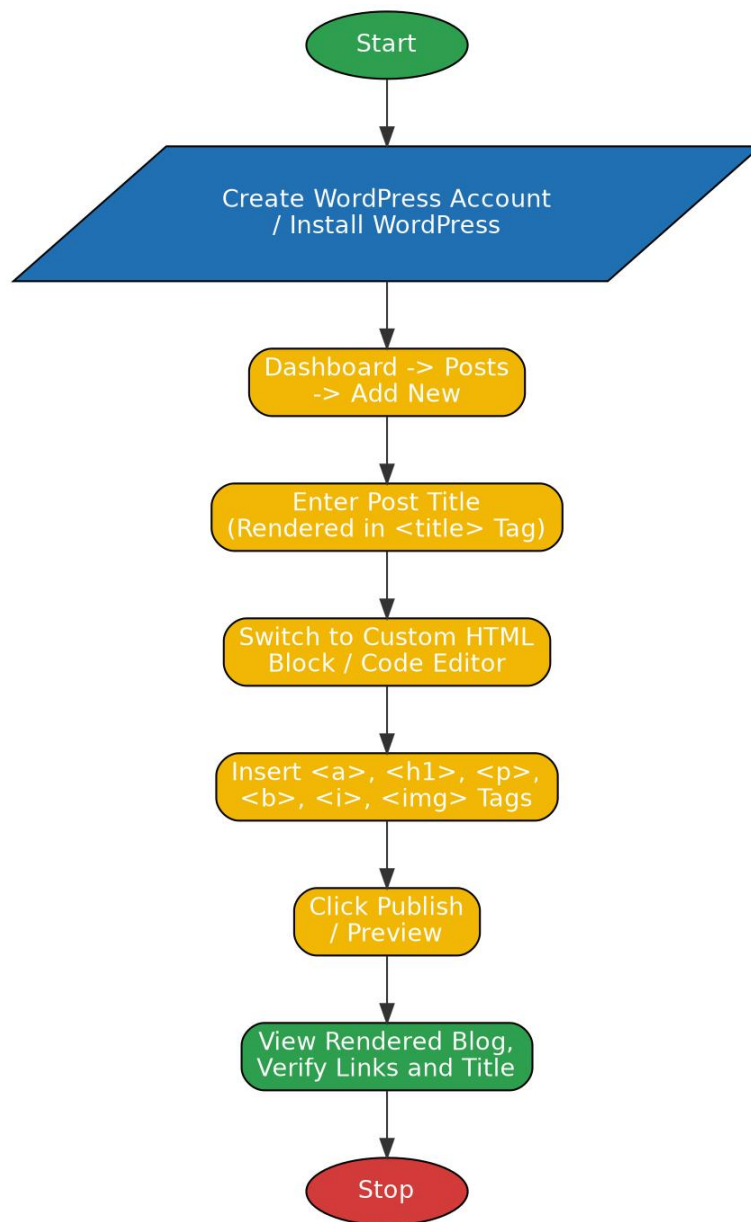

<p>This blog post demonstrates the use of basic HTML tags inside a
WordPress post using the Custom HTML block.</p>
